Frostbite™ Adhesive:
For challenging cold temp applications

Do you struggle with initial tack and poor adhesion in freezer conditions? Does your application conditions involve frost and moisture on the substrate? Our Frostbite™ adhesive provides a great solution to these challenging applications.

Frostbite is a highly aggressive, rubber-based permanent featuring excellent initial tack and ultimate adhesion to flexible packaging and varnished paperboard packaging when applied at freezer conditions. An excellent choice when applied to packaging materials at room temperature and then subjected to -40°F blast freezing conditions. Frostbite will also adhere to a variety of surfaces despite specific amounts of frost and/or moisture, but testing is recommended.

Minimum application temperature: -15°F | Service range: -65°F to 160°F

Freezer applications include:

- shipping labels (frozen food distribution)
- stretch wrap and varnished paper board packaging
- flash freezing environments
- prepackaged frozen foods
- medical packaging

Cold / moisture applications include:

- institutional milk bags
- packaged frozen poultry
- waxed corrugate
- coupons / booklets

We offer a variety of facestocks with Frostbite adhesive for various applications. Call our Technical Consulting Hotline at 877.210.5104 or your Account Manager at 800.543.9452 for help.
