

Endless Options for Laser Printing

Mactac® offers an expanding breadth of high-quality, high-performance products for laser and ink jet printing. MACcopy® for laser and MACjet® for ink jet offer excellent layflat performance in a variety of facestock options, high-gloss laser, matte clear laser, white PET laser, removable laser, high-gloss ink jet and matte coated ink jet.

Roll Label

PSA-coated papers and films in roll-to-roll form. Extensive product options, available customization, varying roll lengths and widths, and customer friendly services, like our Mactac PreciseSM Program, which offers a precise amount of material needed for small runs and limited applications.

From adhesive to facestock to liner, our products address the needs of your growing market.

- Our patented non-ooze MP910 adhesive leaves sheet edges dry and clean and eliminates the need for time-consuming matrix stripping and excess matrix disposal, enabling you to run your press at higher speeds.
- Mactac offers one of the broadest ranges of facestock options with exceptional brightness and whiteness as well as superior toner anchorage, allowing you to meet all your application needs.
- Through pre-screened facestocks and liners as well as extensive testing, Mactac ensures guaranteed layflat performance time and time again.

Toner Fusion / Ink Jet Paper Stocks

Product	Adhesive	Liner Caliper (mils)	Product Number	Width	Ink Jet	Laser
MACcopy® Standard This bright white dual purpose stock is designed for excellent black and color image quality processing in most ink jet, laser printers and photocopiers. Matrix removal recommended for adhesives other than 910.	910 (NON-OOZE) Patent 5154974	3.2 LF	LAS1812	78"	✓	✓
