

Direct Thermal Labelstocks

Optimal Performance

Reliable Scanning. Every Time.

Optimal Performance Direct Thermal products are purpose-built to meet demanding applications without unnecessary complexity.

Smartly engineered for exceptional scanning performance, smudge resistance, crisp imaging—ensuring barcodes perform flawlessly from print to final scan.

Optimal Performance is your solution for dependable performance, superior reliability, and the efficiency your operations count on.

Superior scanning reliability across applications.

Optimal Performance DT products deliver performance through highly reliable barcode readability at visible light (633nm).

The product line offers versatile, high-performance solutions that excel across multiple applications—from logistics and distribution to deli weigh-scale labeling and retail environments.

Exceptional flexibility across a variety of applications empowers businesses to streamline and optimize operations by relying on fewer labelstocks—providing the opportunity reduce SKUs and inventory and manage costs.

Simply DT™ Optimal Performance products are engineered to deliver:

- Strong protection against heat, humidity, and plasticizers
- Superior resistance to scuffing and fading
- High performance in non-climate-controlled environments

PLUS, Optimal Performance products are manufactured with no added bisphenols and comply with the newest bisphenol legislation.

Precisely engineered for the results your business demands.
