The **6500 Metallic** and **6600 Solid** colors are 2.0 mil premium high-performance cast vinyl films designed for the toughest applications. These films offer excellent weathering and aging performance, perfect for irregular surfaces with rivets and corrugations where conformability and extended outdoor durability are required.

The **6700 Gemstone** colors are 3.0 mil cast vinyl films with excellent gloss, color depth, and opacity. Seven unique colors with a high concentration of metallic flakes give any application dazzling, dynamic graphic accents.

The **6800 Electric** colors are 2.3 mil cast vinyl films used for high-impact graphic accents in short-term indoor or outdoor applications.

Glass Etch is frosted cast film with 78# liner for privacy applications for windows and office settings.

Carbon Fiber is a cast vinyl film with 90# air-egress liner great for accent applications in vehicles.

Mactac cast standard products have a solvent acrylic permanent adhesive, a 78# liner and are available in 48" x 150' rolls.
